YOUR RELIABLE TEAM PLAYER ON THE FIELD

The TinyLineMarker Sport is a reliable, accurate and user-friendly robot that frees up time for grounds managers to do work that requires real craft and experience.

TinyLineMarker Sport is a fast and easy solution for your line marking. Instead of using all your time on tedious markings, the TinyLineMarker Sport assists you in the job by marking your soccer field in just 27 minutes - leaving you with more time to focus on other essential tasks.

The initial marking is now as easy as re-marking; no need to calculate or measure the field before the season starts. Just grab the tablet, choose your field, press Start and let the line marker deliver accurate lines with excellent quality and less manual work.

The intuitive tablet contains an easy and flexible re-adjustment system, which allows you to keep full control over your fields. You simply choose the field template and then place the field on your map. The TinyLineMarker Sport will paint the field in that exact location and the location is then stored for all future markings.

The robot's lightweight and smooth construction makes it easy for you to move it from field to field or transport it in your car without complications.

For the professional grounds manager who wants to deliver excellent quality with less manual work

If you want to provide high-quality fields for your team, school or customers, then book a free demo of the TinyLineMarker Sport and find out just how easy line marking can be. Contact details are on the back.

Your new colleague will provide you with

Time saved

Easy to use, and takes less than 20 minutes to paint a full soccer field.

Comfort

Move between places much easier thanks to low weight equipment.

Reliability

Can repaint an existing field with high accuracy.

Flexibility

Easy to switch between fields and customize new templates.

TinyLineMarker Sport

The TinyLineMarker Sport is the ideal line marker for sports clubs and teams with few sports types. With its low weight and simple operation, this model is an easy-going companion in your working day, helping you to deliver excellent quality with less manual work.

The five liter paint container is sufficient for a full 11v11 soccer field, which takes only 27 minutes for the robot to complete. Valuable time you can use for other jobs.

We recommend TinyLineMarker Sport to smaller clubs, teams and organizations that are ready to switch from the traditional line marking machines to a smarter, more efficient method that frees up time for the groundsmen.

Local sports team

Name: Simon
Work title: Team manager

Challenges:

- Hard to find volunteers going forward
- Limited time and budget for line marking
- Planning and completing initial marking is time-consuming

School

Name: Erik
Work title: Janitor

Challenges:

- Line marking is just one of many tasks
- Hard to stay on top of training schedules
- Initial marking requires several days' work

TinyLineMarker Pro

This is our top model, designed for the most demanding jobs. TinyLineMarker Pro has a big paint capacity and all sports templates are included.

The big wheels keep TinyLineMarker Pro going even when the surface is soft, and the sturdy construction ensures reliable operation every time, even in rough weather conditions. With 10 liters in the paint container, Pro can paint several fields before re-fill is needed, and this makes it a real time-saver.

We recommend TinyLineMarker Pro to large sports clubs/teams, municipalities and service providers with many paint jobs and a variety of different sports fields to look after. The robust and versatile robot will prove to be an efficient and non-demanding co-worker that just keeps on delivering.

Municipalities

Name: Martin
Work title: Facilities manager

Challenges:

- Many different sports grounds to maintain
- Many different field types require extra time
- Other tasks on the to-do list postponed due to initial marking

Service provider

Name: Jonas
Work title: Grounds manager

Challenges:

- Profit depends on quality; and that takes time
- Transporting equipment each day
- Line marking is one of several services and has to be accurate and efficient every time

Which line marker should I choose?

VS
